SUMMARY

I am a highly skilled and passionate Software Full Stack Developer with years of learning experience in web application development. I am also a mission-driven Software Fullstack developer that focuses on JavaScript, TypeScript, React, Python, Django and SQL.

I'm a focused and efficient learner with practical expertise in web application and I am seeking a professional career-breakthrough into tech as a FullStack Developer.

TECHNICAL SKILLS

- Experience with various frameworks and technologies like JavaScript, TypeScript, React, Django, and SQL.
- Experience in using Redux.
- Experience in databases like MySQL and PostgreSQL.
- Strong development skills including building APIs that are RESTful.
- Experience in using Git for version control.
- Experience building applications with Progressive Web App support.
- Experience in operating system environments including LINUX and Windows.
- Knowledge of Continuous Integration/Continuous Deployment.
- Experience working with Serverless technologies like AWS
- Working with ECMA Script 6 (ES6) features for the build of JSX and ECMA Script 5 (ES2015).
- Experience using styling technologies like Sass CSS, Material UI, Bootstrap, Styled components.

CERTIFICATIONS

- Introduction to Computer Science - Harvard CS50x
- Web Programming with Python and Javascript - Harvard CS50Web
- Introduction to programming with Python - Harvard CS50P
- Introduction to Artificial Intelligence with Python - Harvard CS50AI
- Backend (Python) - I4GXZuri Scholarship

EDUCATION

University of Uyo • B.Sc. in Estate Management

2013 - 2018, Nigeria

KEY SKILLS

Tech

Frontend Development, Backend Development

Soft Skills

Focused, Ambitious, Communicative, Artsy, Conscientious, Self-starter

Programming Languages

JavaScript, TypeScript, Python

Frontend Technologies

React, Redux, HTML5, CSS3/SCSS, Bootstrap, Styled Components, Material UI

Backend Technologies

Python, Django, PostgreSQL, MySQL

Devops

Git, Heroku, AWS, Unit Testing, Integration Testing, Continuous Integration/Continuous Deployment

Operating Systems

LINUX, Windows, Mac OS

PROJECTS

- During my scholarship with Zuri, I was able to build a price compare app with a group of other developers as a final project
- I've also gone ahead to build projects like a Mini Wikipedia, an E-commerce website, a Mailbox, a Social Network app, a Stock Market Finance app, a Banking System, A finance Tracker (A budget App) while taking CS50 courses
